

ADVANTAGES OF FALSE BOTTOM TECHNOLOGY IN RICE PARBOILING

Accessibility

- You only need to add “false bottom” to your parboiling pot or drum.
- You can ask local fabricators to make false bottom.

Technical Advantages

- You can sell milled rice at higher price by 10 – 20% (Colour of milled rice is whiter creating additional value).
- You can save water for parboiling (Less amount of water is required).
- You can save firewood (Steaming time is shorter).
- You can save time for drying (Drying time is shorter).

Affordability

- Cost of false bottom can be recouped by the additional value after a few parboiling practices.
